

Rosedale Green Upgrades to NOVAtime 4000 Time and Attendance / Workforce Management STARbox Solution

Upgrade to NOVAtime 4000 Time and Attendance / Workforce Management STARbox solution benefits the skilled care facility with seamless third-party integration and user-friendly reporting capabilities.

Diamond Bar, CA ([PRWEB](#)) November 21, 2014 -- NOVAtime Technology, Inc. (<http://www.novatime.com>) announced today that long-time Cincinnati Time Systems and NOVAtime client Rosedale Green recently upgraded from NOVAtime 3000 to [NOVAtime 4000 Time and Attendance / Workforce Management STARbox solution](#), the on-premise, client-hosted version of NOVAtime's signature web-based workforce management system.

Located in Latonia, Kentucky, Rosedale Green is a not-for-profit skilled care facility. The organization provides resident-directed living for individuals requiring long-term care or short-term nursing assistance. Rosedale Green has been a long-term client of Cincinnati Time Systems, initially with the NOVAtime 2000 system in 2001 and later with NOVAtime 3000. The organization's most recent upgrade was to the NOVAtime 4000 STARbox solution.

According to Brad Stanford, Assistant Administrator at Rosedale Green, the organization's recent decision to upgrade to the NOVAtime 4000 STAR system was motivated by a desire to have leading-edge technology from trusted providers. "We continually seek to stay current with technology just like NOVAtime," explains Mr. Stanford, "Our time and attendance system is one area where we have especially tried to be as current as possible. The professionalism and competence of Cincinnati Time Systems has given us the confidence to make each upgrade to our NOVAtime time and attendance system. Each time we have upgraded, Cincinnati Time Systems has provided tremendous support and overall customer service."

Third-party integration with the staff scheduling application OnShift also proved a powerful deciding factor in Rosedale Green's decision to upgrade. The ability to share employee demographics, schedules, and time data eliminates the need for duplicate entry. In addition to OnShift integration, [NOVAtime 4000 supports integration with over 300 H.R., payroll, and ERP partners via flat-file import/export](#).

For Mr. Stanford, another benefit of the upgrade to NOVAtime 4000 has been the system's enhanced reporting capabilities. "Personally, I have found the report generation much more user-friendly in NOVAtime 4000," says Mr. Stanford. The [NOVAtime 4000 internal report generator comes with over 100 report templates that can be configured to meet specific needs. In addition, multiple report output formats are supported, including PDF, Excel, Rich text, HTML, and CSV file, and reports can be published or automatically e-mailed to selected system users](#).

Through continual research and development, NOVAtime is proud to be able to offer Rosedale Green best-of-breed technology. NOVAtime is also proud to partner with Cincinnati Time Systems to ensure this technology meets our client's needs. As Mr. Stanford attests, Cincinnati Time Systems treats its clients as partners, "They are always there when needed and continue to ensure we stay abreast of other opportunities that may be beneficial to our organization. We truly rely on them as our experts when it comes to our time and attendance needs and wants."
