

Nu-Pak, Inc. Successfully Implemented NOVAtime's Workforce Management System, with the Powerful Advanced Scheduling Manager (ASM) and Family Medical Leave Act (FMLA) Add-On Solutions

NOVAtime is proud to announce that it has successfully implemented its NOVAtime Workforce Management / Time & Attendance solution for Nu-Pak, Inc., meeting their business needs with the Advanced Schedule Manager (ASM) and Family Medical Leave Act (FMLA) Modules supplementing the core system.

Diamond Bar, CA September 19, 2017- [NOVAtime Technology, Inc.](#) a cutting-edge Workforce Management / Time & Attendance provider is proud to announce that it has successfully established NOVAtime's premier Workforce Management / Time & Attendance solution for Nu-Pak, Inc.

[Nu-Pak, Inc.](#) is a premier provider of packaging, converting, manufacturing, and warehousing services based in Wisconsin. Priding themselves in providing the highest quality product and services possible, Nu-Pak continues to expand its operations through a proven ability to meet customer's needs and through word of mouth advertising.

With a business that does as much as Nu-Pak does, it is no surprise that they have unique business needs not faced by other businesses or even other manufacturers. They needed an efficient and robust scheduling system that was able to autopopulate often chaotic schedules, check employee qualifications for each position, and be changed on the fly. With these needs recognized, NOVAtime deployed its [Advanced Schedule Manager \(ASM\)](#) Module to meet them.

Tim Manning, Human Resources/Safety Manager at Nu-Pak, describes their transition to NOVAtime's ASM from their old scheduling procedure, "We used to perform all our scheduling through Excel files, which made it very difficult to inform employees of changes to their schedule. Now with ASM, whenever a supervisor makes a change, a notification is automatically sent out to the employee, informing them of the schedule change."

Nu-Pak also needed an advanced solution for Family Medical Leave Act (FMLA) leave events. [NOVAtime's FMLA module](#) was able to meet these needs, with features that automate and track FMLA leave events. Features include autopopulating schedules for employees on leave a centralized place to store documents related to leave cases, and notifications for import dates. "It's really nice how when an employee goes on FMLA leave, the system automatically populates their timesheet with the FMLA code." Said Mr Manning.

NOVAtime was able to further assist Nu-Pak by streamlining their payroll process using the system's built-in report generator. Mr. Manning describes the improvement, "It used to take our payroll specialist half of a day to prepare hours for the payroll process. NOVAtime was able to automatically pull the needed information without any need for manual data entry."

"Now with ASM, whenever a supervisor makes a change, a notification is automatically sent out to the employee, informing them of the schedule change"

The benefits seen by NOVAtime were not just felt by the supervisors and administrators of Nu-Pak, but were felt by the employees as well, who found new functionality and flexibility in NOVAtime's [Native Mobile App, NOVAmobile](#) (for iOS, Android, and Windows Mobile devices). Mr Manning explains "NOVAmobile allowed our employees to request and view their time off, and view their schedules in real-time. This is a great improvement for employees who previously did not have access to this information at their fingertips." It's a great employee self-service tool.

With benefits felt by both supervisors and employees, NOVAtime and the ASM module have saved Nu-Pak time, reduced the risk of manual data entry errors, and allowed them to continue to focus on providing the highest quality product and services possible.

Nu-Pak pairs NOVAtime with Ascentis for its payroll needs.
