

San Antonio Armature Works, Inc. Eliminates “Buddy Punching” with NOVAtime Solutions

San Antonio Armature Works, Inc. has selected NOVAtime 4000 to automate its time and attendance processes.

San Antonio Armature Works, Inc. is a family-owned business that was established in 1922, specializing in the supply and repair of industrial rotating equipment for both government and private sectors. With facilities of over 20,000 square feet, San Antonio Armature Works is committed to providing reliable repairs, quality products, and excellent service.

“I also enjoy the ability to view the time sheets over the web. I don’t have to be at the office to review. And I can do the payroll anywhere now.”

“Buddy punching,” the process of employees clocking in or out for one another, was a problem for San Antonio Armature Works due to their existing manual time clocks. Because of this, the company decided to implement the NOVAtime 4000 solution with GT400 biometric handprint time clocks, eliminating buddy punching, streamlining data collection, and saving payroll processing time.

NOVAtime 4000 is a workforce management system complete with time, attendance, accruals, leave, scheduling, and reporting capabilities. The system enables companies of all sizes to manage employees' time and attendance with accuracy, calculate job and labor data to control expenses, and prepare timely payrolls with exceptional reliability. David Deininger, Controller at San Antonio Armature Works, states that “NOVAtime is working well and saves me a lot of time!”

When asked about the best feature of NOVAtime 4000, Mr. Deininger said, “the ease of corrections.” Indeed, NOVAtime 4000 enables supervisors to quickly make corrections to employee time sheets, with an audit trail that tracks adjustments, streamlining the payroll process.

Mr. Deininger continues, “I also enjoy the ability to view the time sheets over the web. I don’t have to be at the office to review. And I can do the payroll anywhere now.” San Antonio Armature Works is able to export employee data from NOVAtime 4000 to the company’s ADP payroll system, making payroll processing more efficient than ever.

Accutronics Inc., a premier authorized NOVAtime reseller, performed the implementation for San Antonio Armature. Mr. Deininger describes the services as “excellent. Mr. Boyd [at Accutronics] is very helpful when I need him.”

NOVAtime and Accutronics are happy to provide services and look forward to continuing a great relationship with San Antonio Armature Works.
