

NOVAtime Seals the Deal with Blue Seal

Blue Seal Building Supply implements NOVAtime 4000 SaaS automated time and attendance technology to grow its family business.

Diamond Bar, Calif. December 10, 2014 -- NOVAtime Technology, Inc. (<http://www.novatime.com>), provider of leading-edge workforce management solutions to over 16,000 organizations of all sizes, announced today that Blue Seal Building Supply (www.bluesealbuildingsupply.com) has selected NOVAtime 4000 to automate its time and attendance processes.

"At first, our secretary was most against the idea of switching to NOVAtime, but now she is the one who loves it the most!"

Founded in 2010, Blue Seal is a family owned business committed to finding the lowest priced insulation and building materials for homeowners and small contractors. Over the past four years, Blue Seal has built relationships with distributors all over the country, and now services the entire United States. Blue Seal has recently extended its presence into Canada.

"We have grown fast and steadily. It started out as just us, husband and wife. Hiring that first employee was the scariest but best step for us, and we have never looked back," says Spring McDonald, Account Manager for Blue Seal. "We hired our first employee almost 2 years ago, and we currently have 9. Our employees are wonderful and our biggest asset. Overall we have learned in this short time that our employees want to be treated fairly and respected. The new NOVAtime system does a great job doing just that, and everyone has really liked it."

The NOVAtime 4000 system provides small businesses with the ability to accurately manage employees' time and attendance; calculate job and labor data; and prepare timely payrolls with exceptional reliability. For Blue Seal, NOVAtime integrates with Wells Fargo via a payroll bridge that allows a file to be exported from NOVAtime in the exact format needed by Wells Fargo for payroll processing.

Blue Seal was previously using a shared Google Doc for timekeeping, but as the company grew, it experienced growing pains. The shared document became unusable as employees would have to scroll to locate their name and enter their clock in/out times. Not only was this process laborious and inaccurate, but some employees would forget to clock in/out, forcing them to estimate their hours. Privacy became another concern since everyone's hours were visible to all employees.

NOVAtime 4000 allows unique logins for every employee and supervisor, which addresses many of Blue Seal's needs: "NOVAtime has saved us a lot of time, and our employees have really enjoyed it. At first, our secretary was most against the idea of switching to NOVAtime, but now she is the one who loves it the most!"
