

A Clean Implementation for National Laundry

National Laundry Co. selects NOVAtime to automate their time & attendance and payroll processes.

Diamond Bar, Calif. April 29, 2014 — NOVAtime Technology, Inc. (<http://www.novatime.com>), provider of leading-edge workforce management solutions to over 16,000 organizations of all sizes, announced today that National Laundry Co. (<http://www.nationallaundry.com/>) has selected NOVAtime to automate its time and attendance processes.

"Everyone at NOVAtime has been very helpful. If I needed anything, they are very happy to help. NOVAtime is a great company to work with."

Established in 1910, National Laundry began by offering shirt service and laundry washed and dried by the pound. National Laundry has now grown to include: laundry, dry cleaning, pillow service, alterations, leather cleaning, linen supply service, paper products, janitorial products, and direct sales, serving the North West Montana area for the past 100 years. National Laundry currently has a staff that operates 6 linen supply routes serving over 2,000 active commercial customers, and has 2 retail outlets in Great Falls, and with their growth came a need for an automated time and attendance service.

"Our old system needed to be replaced, and Wells Fargo suggested NOVAtime to streamline our timekeeping and payroll processes," says Rick Simmons, Manager at National Laundry, who attests to the pleasant and professional experience from start to finish. "Everyone at NOVAtime has been very helpful. If I need anything, they are very happy to help," Rick said. "NOVAtime is a great company to work with. They have a very professional staff that is eager to please."

The NOVAtime system provides businesses with the ability to accurately manage employees' time and attendance; calculate job and labor data; and prepare timely payrolls with exceptional reliability. For National Laundry, NOVAtime integrates with Wells Fargo via a payroll bridge that allows a file to be exported from NOVAtime in the exact format needed by Wells Fargo for payroll processing.

"NOVAtime has streamlined our payroll process," Rick indicated. "The best feature is being able to download the punches directly into our payroll system." NOVAtime is 100% web-based for all users, including the payroll administrators, who can access the system through a PC via a web browser to review, edit, process, and manage timesheets and pay data.

For National Laundry, NOVAtime captures an employee's start and stop time through their biometric timeclock, and then applies National Laundry's specific pay policies to each employee. This information is then processed to their payroll application, and the entire automated process allows more time for National Laundry to continue delivering the same quality service they have been offering for the past century.
