

LuckyVitamin.com Chooses NE Time Systems for a Healthier Bottom Line

LuckyVitamin.com sees a significant increase in productivity by employing the NOVAtime 4,000 Software as a Service-hosted workforce management solution

"Positive and productive changes were noticed within the first week!"

Lancaster, PA ([PRWEB](#)) February 9, 2011 -- Established in 2004, LuckyVitamin.com was one of the Internet's pioneers for online distribution of health and wellness products in a vitamin and supplement industry, providing natural health experience to the masses. With products from over 1,000 name brand manufacturers, Lucky Vitamin needed a time and attendance system maximizing efficiency without compromising quality. www.NETimeSystems.com provided the solution, helping the support teams at www.LuckyVitamin.com fulfill their promise to the customer, "making the time between your final click and the arrival of your package seem like seconds".

Since August of 2010, LuckyVitamin.com has been operating with increased productivity and ease due to the NOVAtime 4,000 SaaS solution with NT6500 biometric terminals. The solution is implemented and supported by NE Time Systems, allowing LuckyVitamin.com to meet logistical demands while effectively managing employee information. Eric Wuest of the HR department recalls that the former ADP system failed to meet the present needs of the company, lacking current features. Replacing the archaic model with an innovative NT6500 biometric terminal has allowed for a cost-effective transition to a paper-less, self-sustaining HR department. "I couldn't believe how much of a difference it made," says Eric. The size and productivity of LuckyVitamin.com demands a system that is externally supported, handled by someone outside of the office, like Steve from the tech team at NE Time Systems.

When asked how the system was benefitting the organization Eric Wuest, HR manager at LuckyVitamin.com comments, "Oh, a lot of ways. Positive and productive changes were noticed within the first week". Operating twenty-four hours a day, seven days a week, the NOVAtime NT6500 smart terminal is like an employee in and of itself – allowing employees to have direct access to personal information, managing tasks such as Time-Off requests and other bookkeeping duties online, yielding a significant swell in productivity.

LuckyVitamin.com continues to use online ADP payroll software. Working together, NE Time Systems integration with the NOVAtime system has been seamless, exceeding expectations. By consolidating data, promoting timely management decisions and caring for individual employee requests, the NOVAtime 4,000 system is able to achieve savings and reduce clerical concerns, allowing LuckyVitamin.com to maintain 5-star customer service.
