NOVAtime Introduces New Push Technology Fingerprint Time Clock and Mobile PDA Scanner at the American Payroll Association's 26th Congress in Austin, Texas

NOVAtime announces its participation in the 26th Annual Congress of the American Payroll Association (APA) to unveil their latest line of push technology hardware and data collection devices. During the conference NOVAtime will demonstrate its powerful Workforce Management Solutions and flexible application integration to Human Resource and Payroll professionals.

Monterey Park, CA (PRWEB) May 10, 2008 -- NOVAtime Technology, Inc. (http://www.novatime.com), a forward-thinking workforce management solution development company, today announced that it will showcase their newly released push technology data collection devices and the latest features available in their NOVAtime 3000 Enterprise Edition and NOVAtime 4000 Software as a Service (SaaS) solutions at the American Payroll Association (APA) congress in Austin, Texas, between May 13th and May 17th, 2008.

 The APA's annual congress has conventionally offered exceptional training and comprehensive educational experience for many payroll and human resource professionals. Many payroll and HR personnel from around the country will attend the tradeshow to listen to guest speakers, continue their payroll education, and learn more about products and solutions offered by companies like NOVAtime.

 NOVAtime supports the most comprehensive selection of data collection options, including badge terminals (proximity HID / barcode / magnetic stripe), hand-punch terminals, fingerprint terminals, PDA scanners, and telephone. The latest push technology implemented by NOVAtime automatically "pushes" employee time punches to NOVAtime's workforce management system without the need for a data-collection computer. Brian Harris, Director of Professional Services, states, "Our push technology clocks require minimal network configuration and are supported in even the most secured networks across the country."

 "NOVAtime's family of innovative push technology devices has grown - in addition to the NT6500 'push technology' touch-screen time clock, we have recently released the NT380P and NT6000. The NT380P is an affordable push technology fingerprint time clock that delivers the amazing benefit of a push technology biometric time clock," says Gil Sidhom, Vice President of R&D at NOVAtime. "The NT6000 is a mobile PDA scanner utilizing the same push technology, and it can work with Wi-Fi or GPRS in celluar. It's ideal for companies with mobile workforce and job tracking needs. The installation for any of our push technology time clocks is easy," adds Sidhom.

 NOVAtime will be on display at Booth #1229. "The annual APA congress is an extraordinary payroll event with great exposure. We will show payroll executives and human resource professionals how our leading edge push technology hardware solutions and NOVAtime's time and attendance / workforce management solutions can be used to protect their company's bottom line and allow them to proactively manage their workforce," says Frank Su, NOVAtime's Founder and President.

 "Our solutions are load balanced and truly scalable to fit major corporations and government agencies. Whether your company prefers to purchase a system or have NOVAtime host it for your company, we have a proven

solution that can help you to manage your workforce efficiently," says Gary Anderson, NOVAtime's Sales Director.

Established in 1999, NOVAtime has over 10,000 customers all over the world. Due to the tremendous job that NOVAtime and its business partners have done over the past few years, NOVAtime's continued support of the APA and exposure with other national exhibits; organizations are continuing to recognize the NOVAtime brand name as a leader in the time and attendance / workforce management industry.

About NOVAtime:
With corporate offices located in Monterey Park, California, NOVAtime utilizes the latest technology advancements to its complete suite of Workforce Management solutions. NOVAtime serves companies that have between 10 and 40,000 employees with complex data collection requirements such as badge/biometric time clocks, browser-based data collection, telephone, PDA scanners, etc. It offers solutions for scheduling, labor allocation, job costing, work-order management and cost center allocation. NOVAtime has two supported software platforms: a licensed client-server application with web capabilities and hosted software as a service application with multi-tiered multi-tenant infrastructure.
