

NOVAtime Receives Application Security Certifications for its Hosted Workforce Management Suit Through Extensive Third-Party External Penetration and Security-Testing

Plynt certifies NOVAtime's Software as a Service, NOVAtime 4000 Time and Attendance/Workforce Management Solution, as secure through series of external penetration tests.

Monterey Park, CA ([PRWEB](#)) November 25, 2008 -- NOVAtime Technology, Inc. (<http://www.novatime.com>), a forward-thinking workforce management solution development company that continues to apply the latest technology advancements to its suite of Time and Attendance/Workforce Management products and services, today announced that the [NOVAtime 4000 Software as a Service \(SaaS\)](#) application passes the rigorous penetration tests conducted by Plynt.

The [NOVAtime 4000 SaaS](#) is a multi-tiered, multi-tenant workforce management solution, hosted at an SAS 70 Type II data center.

Plynt issued two certificates: one for the NOVAtime 4000 Workforce Management Solution (Supervisor Web Services, Employee Web Services, and Administrator Web Services), and one for the NOVAtime Enterprise Web Services (N.E.W.S.), a secured middleware services for NOVAtime 4000 Enterprise Application.

The Plynt Certificate establishes that a web application has adequate measures to guard against remote adversaries and protect against a wide range of threats. An application must demonstrate through remote testing that these security criteria are met before it is awarded the Plynt Certificate. The Certification Standard is composed of 23 criteria. These are organized in two sections: Section 1, "Security Protection Criteria," identifies the defenses an application must demonstrate to get the Plynt Certificate. Section 2, "Security Requirements Criteria," specifies the features and behavior an application must have to get the Plynt Certificate.

By and large, penetration tests are targeted at critical web applications, especially those with sensitive data, including customer billing, personal data, banking, etc. to satisfy top management, enterprise customers and to achieve regulatory requirements like PCI, SOX, & HIPAA compliance..

"We are very pleased and proud to have achieved this important validation and milestone. This certification represents a significant step forward in validating the standard and quality of the solutions provided by NOVAtime Technology, Inc.," said Frank Su, president of NOVAtime. "NOVAtime has always been committed to software excellence, and passing the Security Penetration Test conducted by Plynt is a reflection of that commitment."

"Our NOVAtime 4000 SaaS solutions have high development qualities and standards," stated Gil Sidhom, Vice President of Research and Development of NOVAtime, "Our customers can use the NOVAtime 4000 SaaS web sites with the confidence that they have been tested secure against potential intrusions--tested by Plynt, a leader in the application security-penetration testing industry."

For more information on the NOVAtime 4000 Software as a Service hosted workforce management service or the application security certificates issued by Plynt, please email sales@novatime.net or call 877.486.6682.

About Plynt

Plynt is the security-testing division of Paladion, the full-service information security provider.
