

Labor Temps Uses NOVAtime 4000 Software as a Service (SaaS) Hosted Timekeeping Solution to Provide Cost-Effective Enterprise Workforce Management

Labor Temps Uses NOVAtime 4000 Software as a Service (SaaS) Hosted Time and Attendance Solution to Provide Cost-Effective and Reliable Enterprise Workforce Management for its Clients

Diamond Bar, Calif. ([PRWEB](#)) October 31, 2011 -- NOVAtime Technology, Inc., a forward-thinking Workforce Management solution development company, announced today that Longley Systems, Inc. implements the [NOVAtime 4000 Software as a Service \(SaaS\) hosted solution](#) for Labor Temps. The implementation of this cloud-based solution for their managed services clients is another example of Labor Temps' commitment to providing Enterprise Workforce Management in a cost-effective and highly reliable package.

Labor Temps, a leader in the Chicago-area light industrial staffing services for 20 years, works with its longtime partner, Longley Systems, Inc., a premium authorized reseller of the NOVAtime's Workforce Management Solutions. Labor is one of the largest expenses an employer incurs. The right system, technology, and support allow Labor Temps' customers to maximize their most valuable resource. This NOVAtime 4000 system combined with the managed services program has allowed Labor Temps' clients to more effectively manage their workforce. NOVAtime 4000 provides the security, reliability, performance, and scalability to fit any organization's needs.

Managing employees' payroll hours can be an overwhelming and risky process for most companies and, if not done correctly, can create a huge risk. Automating this process to reduce time, errors, and mitigate the risk associated with incorrectly paying employees is of primary concern. Labor Temps has been on the forefront of this initiative by being one of the first staffing agencies in the Midwest to adopt a Longley Systems Time and Labor Management Solution in the mid 1990's. Labor Temps has remained ahead of the competition by continuously seeking out solutions that take it to the next level.

Phil McMahon, President of Labor Temps, states, "The NOVAtime 4000 Advanced Engine Technology provides for the best user experience, fast deployment, seamless integration, and real-time monitoring. When combined with Labor Temps Managed Services, our clients have the tools necessary to positively impact their human capital."

Labor Temps and Longley Systems have been partners for over a decade, and together they understand the value of providing solutions that take advantage of the latest technology, while exceeding the needs of their clients. By adopting NOVAtime 4000 SaaS Workforce Management hosted solution, Labor Temps will improve upon what it has built by providing a solution that will offer enhanced performance, minimal downtime, and a myriad of functionalities that can be tailored to each of its customer's unique needs.

"Working with Phil for over a decade now, I understand his passion for taking care of his customers and his desire to improve his internal processes and procedures. Including NOVAtime 4000 in his repertoire of offerings to his customer makes perfect sense and justifies his desire and willingness to be a leader in his industry." says David Malnar, President of Longley Systems.

About Labor Temps

Labor Temps is a team of staffing professionals that has been serving the Chicagoland area since 1990.
