

NOVAtime Receives Security Certifications for NOVAtime Enterprise Web Services and RESTful Services Solution Through Third-Party External Penetration and Security Testing

Plynt certified NOVAtime's RESTful Services and SOAP-based NOVAtime Enterprise Web Services solutions, as secure through series of external penetration tests

Diamond Bar, CA ([PRWEB](#)) August 18, 2016 -- NOVAtime Technology, Inc. (<http://www.novatime.com>), a forward-thinking workforce management solution development company that continues to apply the latest technology advancements to its suites of Time and Attendance/Workforce Management products and services, today announced that the NOVAtime Enterprise Web Services (N.E.W.S.) and its RESTful Services pass the rigorous penetration tests conducted by Plynt. In July NOVAtime attained the Plynt certification for their NOVAtime 5000 Time and Attendance / Workforce Management solution.

NOVAtime Enterprise Web Services (N.E.W.S.), a SOAP-based web services, and its RESTful Services are connectors for integration with other products and solutions.

NOVAtime Time and Attendance / Workforce Management solution, continues to deliver solid performance, scalability, and reliability. The system can be accessed from the Internet through secure browser connections. NOVAtime has taken vast measures to put NOVAtime Time and Attendance / Workforce Management Solution and NOVAtime Enterprise Web Services (N.E.W.S.) through a series of rigorous penetration testing and has [attained Plynt Application Security Certification since 2008](#). Frank Su, President of NOVAtime Technology, states, "We're pleased and proud to have achieved this important security validation year after year. RESTful Services were offered by NOVAtime to provide more integration options. It is one of our top priorities to make sure our customers data is safe, including data exchanged with alliance partners and other products."

Mr. Su adds, "Attaining Plynt's certification on SOAP-based N.E.W.S. and RESTful Services indicate NOVAtime has adequate measures to guard against remote adversaries for integration connectors, while protecting against a wide range of threats."
