

## NOVAtime Further Demonstrates Its Commitment to Clients with New User Interface

*NOVAtime has revamped the User Interface of its Workforce Management / Time and Attendance system and employers love it.*

RANCHO CUCAMONGA, CALIF. (PRWEB) July 16, 2018 -- NOVAtime Technology, Inc. (<http://www.novatime.com>), an innovative provider of enterprise Workforce Management / Time and Attendance solutions, is pleased to announce the successful implementation of its first fully responsive User Interface (UI).

Last January, NOVAtime released the first fully responsive addition to its Workforce Management / Time and Attendance solutions. Single Page Application (SPA) Timesheets simplified the way supervisors and employees track their time, using JavaScript Object Notation (JSON) to improve data exchange rates, and Web API to send real-time requests to servers. Later that year, in September, NOVAtime released the new Employee Web Services (EWS) module, providing a complete and responsive employee interface platform.

---

*"The new PTO approval page is fantastic! It is rare that software behaves exactly how you would naturally expect it to, and it is a welcome surprise when it does. The PTO approval page performs at this level and makes the work of approving PTO a delight."*

---

Now, thanks to the new UI, this efficiency is accessible to all users for a variety of purposes. Frank Su, President of NOVAtime Technology, Inc., says, "The new navigation, dashboard, and overall UI changes are streamlined to be more user-friendly, allowing supervisors to view information quickly via a simple, accessible layout. It supports our commitment to continued innovation, technology, and today's mobile workforce!"

Mike Lahm, President of [Cincinnati Time Systems](#) (CTS), enthusiastically comments, "Clients were very impressed with the updated, contemporary look of the software and the ease of moving from the dashboard to the editing functions without going through a series of menu selections." CTS is a premier reseller of NOVAtime products.

Using the new PTO / Leave Management Approval page, supervisors can see requests that are pending, approved or declined, make edits or just look into specific employees, groups, or dates with just a few clicks. Schedulers can easily isolate the exact schedule, employee, date or request they want to see, simplifying scheduling and approvals. In particular, the new PTO approval page has been improved to make reviewing and approving employee leave requests more efficient. By just hovering over a certain day, supervisors and managers can

see details such as total number of time off requests, before even opening another page.

“The new PTO approval page is fantastic!” raves Jack Reed, Director of Operations at [NE Time Systems](#) adding, “Among interactive software pages, this is one of the most responsive and intuitive that I have ever used. It is rare that software behaves exactly how you would naturally expect it to, and it is a welcome surprise when it does. The PTO approval page performs at this level and it makes the work of approving PTO a delight.”

***About NOVAtime***
