

NOVApower Analytics™

Companies create a massive amount of workforce management data each day. How they use that data is crucial to their ability to compete in a saturated market. From establishing pricing to planning product placement, the art of turning that information into profits is what sets the most successful companies apart from the rest.

NOVApower Analytics™ is currently being used by top enterprises to help manage labor costing, develop tailored reports and improve job tracking and labor projections. Click the link below to visualize NOVApower Analytics™.

Product Overview

NOVApower Analytics is a new, dynamic way for companies to visualize their workforce management data. ODATA is used to link the NOVAtime Workforce Management / Time and Attendance solution to NOVApower Analytics, allowing all of your workforce data to be transformed into interactive, presentation ready graphs which are both visually impressive and extremely useful. You can retrieve, analyze, transform and report on any data to generate intelligent insights for one of the largest expenditures of your business, your employees' work hours. NOVApower Analytics allows you to visualize and analyze years' worth of data, combining, eliminating and customizing them into various charts and graphs for powerful, analytical, and actionable presentations. Analyzed data can then be scheduled to be sent out via email, allowing businesses to keep tabs on their workforce with ease.

NOVApower Analytics serves as new dynamic way to efficiently pull days, weeks, months or even years' worth of data together providing the insights necessary to adjust processes, practices and policies in just a few seconds!

Operational Efficiency Tool at Your Fingertips

- An optional module for enhanced productivity and efficiency
- Dynamic reporting by groups and fields
- Macro to Micro drill down capability
